Dreaming of Simplifying Your

IT Operations Management?

Are you managing an IT environment with traditional monitoring tools or point-solutions from multiple vendors? Grappling with increased complexity and too much time spent on management and troubleshooting – which impacts your team's productivity? Under unrelenting pressure to reduce costs and downtime, and improve ROI?

THE STUFF OF IT NIGHTMARES

Siloed Visibility
Buried by alert storms and false alerts? Siloed and complex management stacks require lots of manual troubleshooting.

Downtime
Does the root cause lie in the application or the infrastructure? Figuring this out often means many unproductive cycles.

Complexity
Overwhelmed by the growing complexity and scale of data and data centers? Traditional tools and processes weren't designed to handle them either.

Understaffed IT
Mountains of data from physical servers, storage, network, operating systems, databases, events, logs, applications, and more. Can you analyze and correlate all this data quickly enough for proactive action and less downtime?

Reduced Operational Efficiency
Facing a proliferation of scripts, point tools, increasing end-user demands, and over-provisioning? All contribute to inefficient resource utilization and increased manual execution and customization.

No Single IT Operations Management Tool
Ever dream of having one tool that could strategically manage all your virtual and physical infra, apps, OS, and storage solutions? Plus generate insights and troubleshoot infrastructure issues?

Constant Pressure to Reduce Costs
Too many requirements, never enough budget? A patchwork of complex management tools and systems are expensive to maintain and eat up IT resources that could be better spent elsewhere.

EVERYTHING YOU DREAM OF IN ONE UNIFIED IT OPERATIONS MANAGEMENT SOLUTION

Wake up from the nightmare with **VMware® vRealize™ Operations Insight,** a unified management solution with predictive analytics, for performance management, capacity optimization, and real-time log analytics.
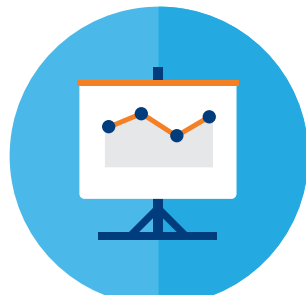

ALL MACHINE DATA

FROM APPS TO STORAGE

SELF-LEARNING MANAGEMENT TOOLS

PERFORMANCE AND INFRASTRUCTURE HEALTH MANAGEMENT

CAPACITY PLANNING, MODELING AND OPTIMIZATION

REAL-TIME LOG ANALYTICS

APPLICATION DEPENDENCY MAPPING
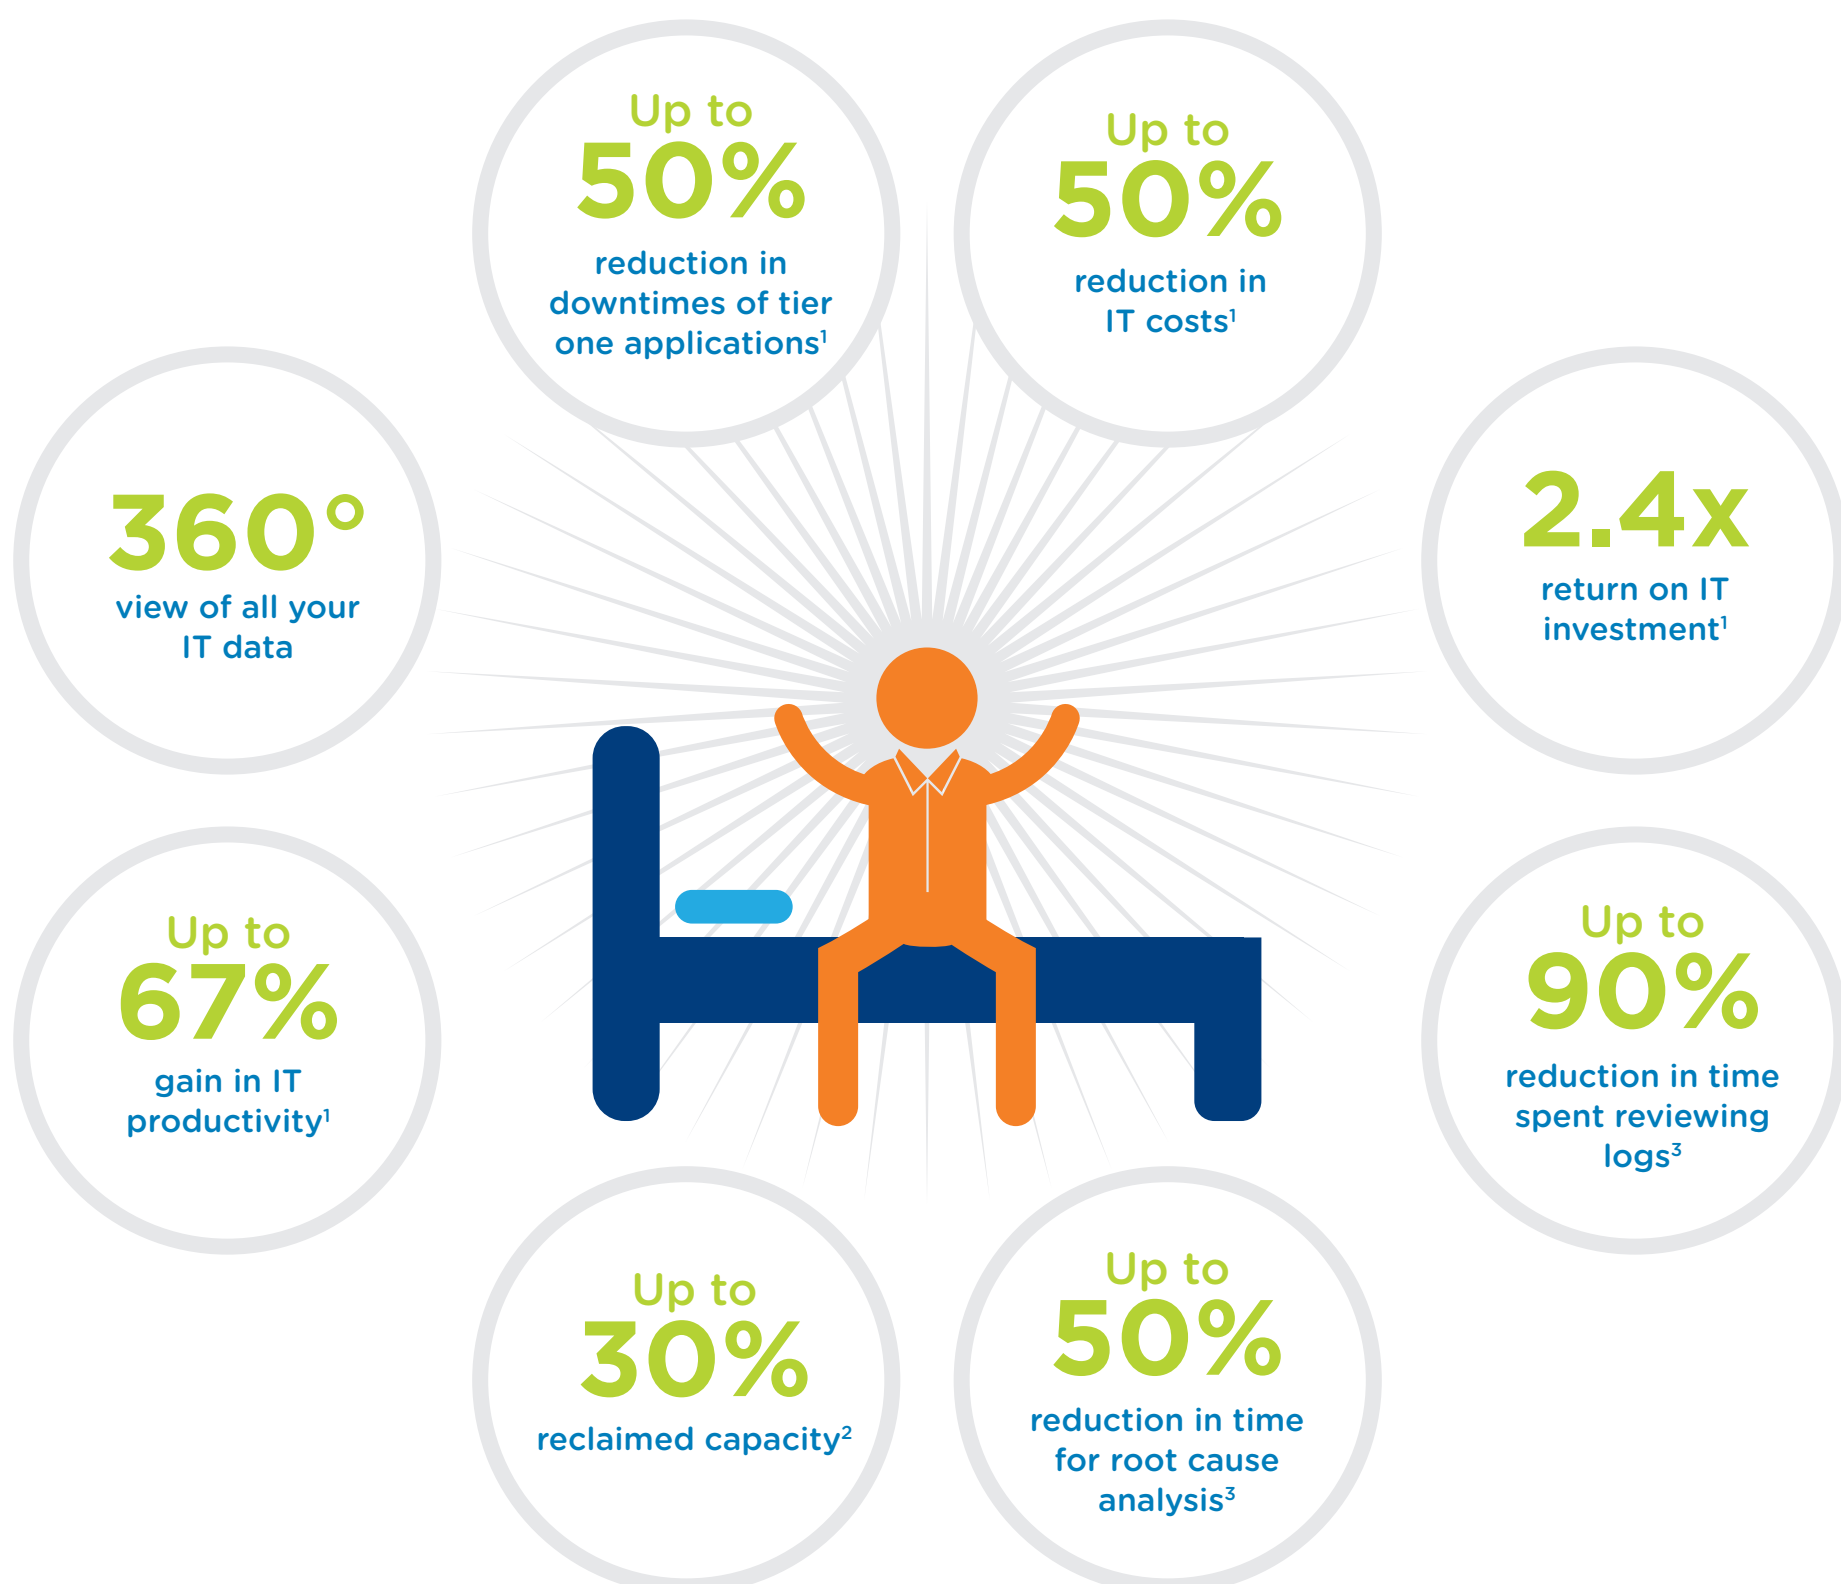

OS MONITORING

STORAGE AND NETWORK VISIBILITY

VSPHERE HARDENING, CHANGE, CONFIGURATION AND REGULATORY COMPLIANCE

UNIFIED MANAGEMENT THROUGH AN OPEN AND EXTENSIBLE PLATFORM

THE STUFF OF IT DREAMS

Up to
50%
reduction in downtimes of tier one applications[1]

Up to
50%
reduction in IT costs[1]

360°
view of all your IT data

2.4x
return on IT investment[1]

Up to
67%
gain in IT productivity[1]

Up to
90%
reduction in time spent reviewing logs[3]

Up to
30%
reclaimed capacity[2]

Up to
50%
reduction in time for root cause analysis[3]

Realize Your IT Management Dream with

vRealize Operations Insight

VMware vRealize Operations Insight is a unified solution designed to help you succeed, delivering intelligent operations management from apps to storage, for businesses of all sizes.
